

# Technijektor Large Flow

## Venturi for Filling

### Product Description

Large flow Venturi injector for very fast dilution and filling. Doses chemical into your chosen tank foamer, bucket, fogger or sanitiser unit directly from a chemical. Chemical is taken from a drum or bucket and dosed directly into the water supply. Chemical dosage is selected using an industry standard orifice dilution plate, which can be changed to vary dosage rate between 0.5% and 6.5%. (Orifice dilution plates supplied separately to suit your dosage needs).

### Features

- Very large flow (up to 6l/min)
- Available in red or blue
- Suitable for use with chlorinated chemicals
- Built to withstand food industry usage
