

# NITA SC SPEED CONTROL UNIT

A SAFETY BRAKE FOR A SAFER ENVIRONMENT

The unique Nita Speed Control system is designed to control the hose rewinding speed for the Nita SC series 2214, 2215, 2216 and 2240 (including the swivel versions)

The Nita Speed Control system acts as a safety brake in the event of accidental hose release by the operator. The hose reel will retract slowly reducing risk of harm to operators and damage to equipment.

## SLOWED REWINDING

For safer working conditions

## TECHNO POLYMER COVER

High resistance cover to withstand impacts

## WATER RESISTANT

Entirely Waterproof with IP65 protection degree

## STAINLESS STEEL

Connection pins & screws suitable for corrosive working environment

## FEATURES

### Shockproof Cover

In black high resistance techno-polymer.

### Molded Seal

To guarantee the IP65 protection degree..

Fixing Screws  
in stainless steel

Nita SC Braking  
System

Transmission Pin

Only works during rewinding phase

## OVERALL DIMENSIONS (MM)
